Forensic

Digital forensic analysis for incident management. Collect, analyze and determine the causes and impacts of critical incidents that have affected your organization

OUTSTANDING FEATURES

Comprehensive analysis: Complete evaluation of the causes and impact of the incident

Rigorous evidence collection: We guarantee the integrity of the evidence

Technical and executive report: Detailed findings and suggestions for mitigating future risks

PROCESS

- Evidence collection: We perform a careful collection following forensic protocols
- Analysis and identification: We determine the causes of the incident and its impact
- Report and recommendations: We present findings and strategies to avoid similar incidents
- Regulatory compliance: We preserve evidence for audits or legal processes

Why choose our service?

- Accurate identification of causes
- Guarantee of operational continuity
- Strengthening the security posture
- Preservation of evidence

Contact Us

IRA Emergency

Rapid response to critical incidents. Our Emergency Incident Response service is designed to quickly activate a multi-disciplinary, FIRST-certified CSIRT team. With urgent response times (SLA), we guarantee immediate action to minimize the impact of attacks

OUTSTANDING FEATURES

Urgent response times (SLA): Commitment to immediate action

FIRST certified CSIRT: Team with extensive experience in incident management

Global coverage: Availability regardless of location or time zone.

PROCESS

- Immediate activation: Request for intervention within minutes
- Initial analysis: Identification of the type of attack and its scope
- Containment and mitigation: Isolation of the incident to prevent spread
- Resolution and report: Final report with findings and recommendations

Why choose our service?

- Immediate SLA
- On-demand access to experts
- Minimization of financial impact

Contact Us

IRA Retainer

Continuous protection for your organization. The Retainer Incident Response service provides 24x7 coverage and immediate availability in the event of declared incidents, ensuring a continuous response to critical cyber threats

OUTSTANDING FEATURES

Proactive monitoring and analysis: Constant assessment of the threat environment

Customized plans: Adaptation of the service to the specific needs of the organization

Periodic reports: Executive reports with preventive recommendations

PROCESS

- Initial assessment: Risk identification and response planning
- Continuous monitoring: 24x7 supervision to detect and respond to incidents
- Immediate intervention: Activation of the CSIRT team upon declaration of an incident
- Continuous improvement: Periodic review of incidents and updating of strategies

Why choose our service?

- 24x7 coverage
- Guaranteed availability
- Continuous access to experts

Contact Us

Sandbox

Advanced analysis of suspicious files in isolated environments. Detects and analyzes suspicious files and programs in a controlled and secure environment, identifying advanced threats

OUTSTANDING FEATURES

Controlled and secure environment: Assessment without risk to your network or systems

Dynamic and detailed analysis: Tracking the behavior of suspicious files

Evaded threat detection: Identification of malware that escapes other solutions

PROCESS

- Loading of suspicious files: The files are executed in an isolated environment
- Behavior monitoring: We observe the impact of the file on the virtual environment
- Detailed analysis: Identification of threats and generation of indicators
- Final report: Results of the analysis and recommendations to mitigate risks

Why choose our service?

- Proactive detection of sophisticated threats:
- Protection against advanced attacks:
- Reduction of false positives
- Strengthening of defenses
