

**BASE4**  
SECURITY

*Your cyber ally*

IDENTITY

We manage digital identities and protect sensitive data against unauthorized access

## DIFFERENTIALS

01

Customized services according to the client's requirements

02

Specialized support by a certified team

03

Intelligent access and authentication control

04

Assurance of international regulatory compliance

# Privileged Access Management (PAM)

Our service provides a platform designed to manage and control access to accounts with elevated privileges, ensuring the security of your organization's critical systems and sensitive data. With PAM, we manage and monitor the access of users with the ability to make important changes to the infrastructure, reducing risks associated with insecure password management

## PROCESS

- Management and control of privileged access to critical systems
- Continuous monitoring of activities in accounts with elevated privileges
- Auditing and detailed reporting on access to ensure regulatory compliance.

## OUTSTANDING FEATURES

Management and monitoring of access with elevated privileges in real time

Reduced risk of security breaches due to insecure password management practices

Advanced tools for auditing and reporting privileged access

## Why choose our service?

- Protection against internal and external threats through privileged access control
- Reduced security risks associated with exposing accounts with elevated privileges
- Regulatory compliance through audits and detailed reporting on privileged access

Contact Us

# Identity Governance and Administration (IGA)

Secure and efficient management of the identity lifecycle. Our service offers a comprehensive platform to securely and efficiently manage the lifecycle of your organization's digital identities. We ensure that each identity accesses only the assigned resources, with the appropriate permissions, during the authorized time, complying with regulations

## PROCESS

- Identity registration with automated assignment of roles and permissions
- Continuous monitoring of the lifecycle of identities and their accesses
- Guaranteed regulatory compliance with periodic reviews and automatic adjustments.

## OUTSTANDING FEATURES

Comprehensive management of users, roles and permissions from a single platform

Centralized control of access to critical applications and resources

Automation of workflows to ensure proper allocation of permissions and resources

## Why choose our service?

- Centralized management of identities, roles and permissions throughout the organization
- Guaranteed regulatory compliance through the automation of access policies
- Consolidated view of the life cycle of identities and their access rights from the moment of discharge

Contact Us

# Access Management (AM)

Secure access control to digital resources. Our service offers a platform designed to securely manage user access to your organization's applications and digital resources. We implement processes, policies and technologies that control access, ensuring that only authorized users access the necessary resources

## PROCESS

- Implementation of user authentication and authorization based on customized access policies
- Continuous monitoring and control of access to applications and resources
- Guarantee of regulatory compliance with periodic reviews of access and permits

## CARACTERÍSTICAS DESTACADAS

User authentication to securely verify your identity

Resource authorization to control which resources users can use once authenticated

Regulatory compliance and protection of sensitive data through robust access policies

## Why choose our service?

- Total control over who accesses your applications and digital resources
- Protection against unauthorized access, complying with security regulations
- Continuous supervision of access to ensure the correct assignment of permissions and avoid risk.
